

# RECOVERY CLAMP

## RECOVERY CLAMP

### Description

**Robust fabricated steel design c/w integral padeye sat both ends for Recovery operations.**

Profiled design to provide a saddle on the upper side of the clamp ID allowing easy seating on the recoverable product.

Shaped clamp ends (and inserts) to provide a scooping style arrangement, which allows the product to be collected from the seabed and drawn into the clamp ID during activation.

Fully mechanical design operated by ROV class 4 torque tool.

### Features
